Second Biggest Earthen Dam

Visit to the second biggest earthen dam in the world – BHAVANISAGAR DAM. Final year civil engineers were given the opportunity to visit this dam during 21-07-2018 which was constructed during post independent period from 1948 to 1955 and it's a multipurpose dam. They have viewed and examined the dam in all the engineering aspects

Second Biggest Earthen Dam

The sweet pride of Coimbatore SIRUVANI WATER TREATMENT PLANT. Third year students have visited the plant during 03-09-2018, they have viewed the various process involved in the secret behind the taste of water etc..

There are nearly 19 dams currently operating in Tamilnadu among them Lower Bhavani is one of the largest earthen dam serving nearly 32 villages for irrigation and drinking. The lower Bhavani project was the first major irrigation project initiated in India after independence in 1948.

It was completed by 1955 and opened for use in 1956. The total construction cost was Rs. 21 crores. The dam receives water from two main catchments in western ghats. The eastern catchment area includes upper bhavani, avalanche, emerald lakes, kundha, pillur, nellithurai. The western catchment area includes Portimund, parsons, valley, pykara, glenmorgn, chinkara, maravakandy, moyar and thengumarahatta.
